

ELECTRONIC MOSQUITO REPELLER

KEEPING THOSE NUISANCES OUT OF YOUR WAY!

ELECTRONIC MOSQUITO REPELLER helps you to get rid of the stinging insects such as mosquitoes or gnats. This newly designed model is to satisfy both domestic use and outdoor use.

Entomology ecology proves that only female mosquitoes will bite human beings or animals when they are in their breeding period. By nature, female mosquitoes will try their best to avoid the disturbance of male mosquitoes. **ELECTRONIC MOSQUITO REPELLER** exploits this nature to produce sound waves having a frequency of approx. 6,000 Hz to imitate the sound of male mosquitoes in order to get rid of the spawning female mosquitoes. The sound generated by **ELECTRONIC MOSQUITO REPELLER** is harmless to pets, humans, and animals.

ELECTRONIC MOSQUITO REPELLER is suitable for both indoor use and outdoor activities. Simply insert two AA(1.5V) batteries and the device is ready to use. The built-in 'push-on' button helps you to turn on and turn off the device. The effective range of **ELECTRONIC MOSQUITO REPELLER** is around 20 square meters.

ELECTRONIC MOSQUITO REPELLER uses no chemicals. It is suitable for use inside houses, garden and during outdoor activities, such as camping, gardening, fishing, etc.

INSTRUCTION

1. Remove the bottom case as shown below by turning it counterclockwise.
2. Insert two AA (1.5V) batteries into the battery box according to the marks of '+' and '-' indicated in the battery box.
3. Replace the bottom case by turning it clockwise until locked.
4. Push the on/off button to turn on and turn off the device. When the device is switched on, the LED will light up to indicate the **ELECTRONIC MOSQUITO REPELLER** is operating properly.
5. A pair of alkaline AA (1.5V) batteries provide electricity for 720 hours of continuous use. **ELECTRONIC MOSQUITO REPELLER** can be powered by alkaline or regular batteries.

USAGE

- Press the power button. You will hear a slight sound and notice the LED is lit up to show the device is in operation.
- Push off the power button after use. The sound will stop immediately.
- You may hang the device on the wall or attach it to the ceiling or simply put it on the floor or shelf near doors or windows to prevent mosquitoes from coming into the room.
- You may carry the device on you while you are outdoors.

NOTICE

- The sound emitted from the device is harmless to humans, babies and pets. However, if a person around is sensitive to the sound, just turn off the unit.
- Do not let the unit come in contact with water. If the unit gets wet, turn it off and remove the batteries. Reinstall the batteries after the unit and batteries are dry.
- It is suggested to use more than 2 pieces of **ELECTRONIC MOSQUITO REPELLER** to strengthen the efficiency.

SPECIFICATIONS

Frequency : Approx. 7,000 Hz.
Power : 1.5V (2 x AA battery)
Dimension : 107 m/m (dia.) x 31 m/m
Power button : push on push off
Effective range : 20 square meters
Weight : 105 grams
